

Part for Clamp Forklift

Part for Clamp Forklift - Often utilized as forklift attachments in chemical and petroleum industries, the Drum Clamp, are particularly meant for the safe handling of typical 55-gallon drums. These additional parts greatly enhance productivity since they can handle as much as 4 drums for each load.

Drum Clamps are likewise used in the food processing industry and wherever product is stored in drums. The use of this additional part not only immensely increases operator productivity but enables the individual driving to grab the drums in a secure way for transport. While trying to handle drums utilizing typical lift truck forks, much instability occurs while cornering and braking. This common drawback could really be handled safely and efficiently by using the Drum Clamp attachment instead.
