

Clark Forklift Parts

Clark Forklift Parts - Currently, there are no less than 350,000 Clark forklifts performing worldwide, and more than 250,000 operating in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 particular components fabricated for 20 exclusive brands of forklifts and automated equipment. Your regional Clark Dealer is your total source for availability of all your components requirements offered by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to provide the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Clark Totalift has a very amazing worldwide support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the material handling industry.

By revolutionizing the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a customary feature on every forklift.

Clark's recurrent mission to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first forklift producer across the globe to be certified with the globally approved quality standard ISO 9001 for every one of their manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing market position.

Clark has selected the structure of "Lean Production" at all of its assembly facilities for the reason that this technique is extremely economical and permits minimal use of resources. Established to ensure maximum efficiency, this system is designed to discover and acknowledge the most efficient methods for production facility stewardship. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Clark's product engineers and suppliers join together to improve the effectiveness and excellence of their products while minimizing expenses. The contemporary value engineering agenda combines progressive product improvement and delivers improved consumer support and service within the industry.
