

Forklift Electrical Parts

Forklift Electrical Parts - Forklifts can be specifically labeled for use in dangerous sites. A marked truck indicates the design has met the lowest requirements of ANSI/UL 558 used for engine powered trucks or ANSI/UL 583 meant for electric forklifts for the type of label put.

The use for labels for lift forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance provider and Fire Marshall for additional info on the approved uses of industrial powered lift trucks in your application.

If the forklift has been proven to satisfy the outlined criteria, the following labels can be put. A marked truck would have the type description located on the lift truck nameplate and will have one of the following labels attached.
