

## Pulp Clamp

Pulp Clamp - There is a wide range of lift truck accessories available to make the machinery more useful. A snowplow attachment can be mounted to the front of the forklift. A scoop bucket could be useful if the task requires moving gravel, snow, sand, or soil. A double block handler allows the person operating the forklift to lift\carry a couple of loads and afterward pile them beside each other. Several of these accessories are extremely great for light to medium duty work.

Among the forklift attachments, called a package lift clamp, permits for the transferring and carrying of really heavy pallets. Pallet crane forks are also used in order to move and lift pallets by utilizing an overhead crane. A drum clamp accessory is helpful for transferring really heavy drums from place to place without having to use a pallet. Lift truck mounted hoppers enable material to be transferred and dumped without having to handle it by hand. These hoppers when the bumper is released are self dumping.

There are even accessories available that can transform the lift truck into a commercial broom or mop. Those accessories are perfect for cleaning boat docks, warehouse floors and parking lots. Lift truck mounted platforms come outfitted with dual entry doors and could be connected to transport workers from one area to another. The mounted platform accessory is nice for reaching parts which could be difficult to access, specifically if you have merchandise or stuff stored in out of the way places or really up high.

Attachments could be a really valuable piece of equipment when installed onto a lift truck, changing a regular forklift right into a mobile hoist unit. It is most helpful when moving unsteady or difficult loads. This attachment can either be mounted on the carriage itself, telescopic, or be fixed or lift truck mounted.
