

## JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

All through their trip, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable marketplace for a product that could quickly and safely lift individuals in the air to accomplish upkeep and other building functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into various marketplaces worldwide and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
