With a network consisting of over 90 independent dealers, the lift truck group provides quality materials handling equipment to the comprehensive North American market. Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and sales locations all through Canada and the U.S. The lift truck product line impressively features 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various vehicle versions range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding forklift company in the North American marketplace, thanks to their consistency in maintaining a high degree of client service excellence and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a expert team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Early product sales of this industrialized equipment focused on large business groups, the armed services and on state-run companies. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for improving quality and product development.

Daewoo started the first home-based forklift business in 1967, and rapidly acquired a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's advanced technological enhancements combined with sales success placed them in a position of substantial growth of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling industry. This plan greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a modern plant which helped set up the company for the manufacture of high added-value goods suited for export. In 1993, the corporation had a international sales system and started exporting versions they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
